

ISO 6780

The ISO 6780 international transportation standard

The ISO 6780 standard is increasingly establishing itself for land, sea and airfreight space.

Sizes

Sizes 400, 450, 600, and 700 fulfil the requirements of the ISO 6780 standard. They are available both as heavy-duty and high insulated, except size 450, which is only available as the high-insulated type.

Design trend

The trend is toward designing freight truck beds, machinery, packaging and all kind of auxiliary equipment for transportation or movement of goods on the basics of ISO 6780 requirements.

Boost utilisation of truck space

One example of the benefits is that utilisation of truck's space can be boosted by up to 15% by using size 400 instead of size 460, which is 3 cm wider and longer.

Easier handling by hand-pallet truck

Another example is that four-way access for hand-pallet truck makes handling easier.
